CITATION INDEX

The listing below includes citations[1] to articles which have appeared in the *Journal of Histochemistry and Cytochemistry* since January 1966.

Abraham, R., Morris, M. and Smith, J.: Histochemistry of lysosomes in rat heart muscle. *J. Histochem. Cytochem. 15:* 596, 1967.
Cited by:
Abraham, R., Hendy, R. and Grasso, P.: Formation of myeloid bodies in rat liver lysosomes after chloroquine administration. *Exp. Molec. Path. 9:* 212, 1968.

Becker, N. H., Novikoff, A. B. and Zimmerman, H. M.: Fine structure observations of the uptake of intravenously injected peroxidase by the rat choroid plexus. *J. Histochem. Cytochem. 15:* 160, 1967.
Cited by:
Olsson, Y.: Studies on vascular permeability in peripheral nerves. 3. Permeability changes of vasa nervorum and exudation of serum albumin in INH-induced neuropathy of rat. *Acta Neuropath. (Berlin) 11:* 103, 1968.
Rothman, A. H.: Peroxidase activity in platyhelminth cuticular mitochondria. *Exp. Parasit. 23:* 51, 1968.

Björklund, A., Ehinger, B. and Falck, B.: A method for differentiating dopamine from noradrenaline in tissue sections by microspectrofluorimetry. *J. Histochem. Cytochem. 16:* 263, 1968.
Cited by:
Braak, H., Baumgartner, H. G. and Falck, B.: 5-Hydroxytryptamine in brain of *Lacerta viridis* and *Lacerta muralis*. *Z. Zellforsch. 90:* 161, 1968.

Bosch, R., Salibian, A. and Romeu, F. G.: On the histochemical demonstration of sodium-activated adenosine triphosphatase. *J. Histochem. Cytochem. 15:* 114, 1967.
Cited by:
Laurent, P., Dunel, S. and Barets, A.: Attempt at histochemical localization of Na^+–K^+ activated atpase of teleostean pseudobranchia epithelial cells. *Histochemie 14:* 308, 1968.

Buta, J. L., Conklin, J. L. and Dewey, M. M.: Subfractions of lactate dehydrogenase of the rat. *J. Histochem. Cytochem. 14:* 658, 1966.
Cited by:
Markert, C. L.: Molecular basis for isozymes. *Ann. N.Y. Acad. Sci. 151:* 14, 1968.

Carneiro, J. and LeBlond, C. P.: Suitability of collagenase treatment for the radioautographic identification of newly synthesized collagen labeled with ^{3}H-glycine or ^{3}H-proline. *J. Histochem. Cytochem. 14:* 334, 1966.
Cited by:
De, D. N. and Ghosh, S. N.: Autoradiographic studies on collagen in plant nuclei. *Experientia 24:* 907, 1968.

Corrodi, H. and Johnson, G.: Formaldehyde fluorescence method for the histochemical demonstration of biogenic monoamines. A review on the methodology. *J. Histochem. Cytochem. 15:* 65, 1967.
Cited by:
Anden, N. E., Corrodi, H., Fuxe, K. and Hokfelt, T.: Evidence for a central 5-hydroxytryptamine receptor stimulation by lysergic acid diethylamine. *Brit. J. Pharmacol. 34:* 1, 1968.
Baumgartner, H. G., Falck, B., Holstein, A. F., Owman, C. and Owman, T.: Adrenergic innervation of human testes epididymis ductus deferens and prostate—fluorescence microscopic and fluorometric study. *Z. Zellforsch. 90:* 81, 1968.
Cegrell, L.: Occurrence of biogenic monoamines in mammalian endocrine pancreas. *Acta Physiol. Scand. 5:* 1, 1968.
Ehinger, B., Falck, B. and Myhrberg, H. E.: Biogenic monoamines in *Hirudo medicinalis*. *Histochemie 15:* 140, 1968.
Olson, L., Hamberger, B., Jonsson, G. and Malmfors, T.: Combined fluorescence histochemistry of ^{3}H-noradrenaline measurements of adrenergic nerves. *Histochemie 15:* 38, 1968.
Rubin, R. P., Cohen, M. S., Harman, S. M. and Roer, E. M.: Localization of adrenaline-rich medullary chromaffin cells adjacent to adrenal cortex. *J. Endocr. 41:* 541, 1968.
Sharp, P. J. and Follett, B. K.: Distribution of monoamines in hypothalamus of Japanese quail *Corturnix japonica*. *Z. Zellforsch. 90:* 245, 1968.

Cunningham, L.: Histochemical observations of the enzymatic hydrolysis of gelatin films. *J. Histochem. Cytochem. 15:* 292, 1967.
Cited by:
Cited by:
Daoust, R.: Localization of enzyme activities by substrate film methods—evaluation and perspectives. *J. Histochem. Cytochem. 16:* 540, 1968.

Daoust, R.: Modified procedure for the histochemical localization of ribonuclease activity by the substrate film method. *J. Histochem. Cytochem. 14:* 254, 1966.
Cited by:
Daoust, R.: Localization of enzyme activities by substrate film methods—evaluation and perspectives. *J. Histochem. Cytochem. 16:* 540, 1968.

Decosse, J. J. and Aiello, N.: Feulgen hydrolysis: effect of acid and temperature. *J. Histochem. Cytochem. 14:* 601, 1966.
Cited by:
Brachet, J., Hulin, N. and Guermant, J.: Acid lability of deoxyribonucleic acids and cell differentiation. *Exp. Cell Res. 51:* 509, 1968.

de la Iglesia, F. A., Porta, E. A. and Hartroft, W. S.: Histochemical urate oxidase activity and microbodies in nonhuman primate liver. *J. Histochem. Cytochem. 14:* 685, 1966.

SUBJECT INDEX

Absorption, horseradish peroxidase, by mucosal cells of duodenum, 229
Acetone, solvent action, on brain and lipid-rich tissues, 115
Acetyl disulfide
  and bis-(thioacetoxy) aurate complex, and acetylcholinesterase, 754
  and thiolacetic acid histochemical method for acetylcholinesterase, 743
Acetylcholinesterase
  acetyl disulfide and thiolacetic acid, histochemical method for detection, 743
  and acetyl disulfide and bis-(thioacetoxy) aurate complex, 754
  content in Renshaw elements, 128
Acid hydrolase, activity in inclusion bodies of alveolar cells and lysosomes in lung, 102
Acid phosphatase
  activity
    fluctuations, in spherosomes in guard cells, 791
    localization in submandibular gland, 572
    preservation and purification of glutaraldehyde, 199
  and aryl sulfatase, in developing nervous system, 582
Activity
  acid hydrolase, in inclusion bodies of alveolar cells and lysosomes in lung, 102
  acid phosphatase
    and purification of glutaraldehyde, 199
    localization in submandibular gland, 572
    of spherosomes in guard cells, 791
  adenosine triphosphatase
    electron microscopic localization, 645
    localization in preneoplastic and cancerous cells, 678
  alkaline phosphatase
    effect of specimen thickness in ultrastructural localization, 721
    localization in submandibular gland, 572
    in neutrophilic leukocytes, 693
  amylase, modified starch film method for localization, 147
  aryl sulfatase, localization in thyroid follicle cells, 467
  enzyme, localization by substrate film methods, 540
  glucose 6-phosphatase, preservation of in formaldehyde-fixed sections, 819
  glutamic oxalacetic transaminase, effect of lead and fixatives, 181
  glutathione reductase, effect of adrenocorticotropin, 185
  hyaluronidase, of alveolar macrophages, 688
  ornithine carbamoyltransferase, demonstration in liver mitochondria, 172
  peroxidase, localization in rat hepatic microbodies, 547
  succinic dehydrogenase, localization, 487
  β-D-xylosidase, histochemical demonstration, 489
Adenosine diphosphate, structural changes induced in rat peritoneal mast cells, 707
Adenosine triphosphatase, activity
  electron microscopic localization, 645
  localization in preneoplastic and cancerous cells, 678
Adenosine triphosphate, structural changes induced in rat peritoneal mast cells, 707
Adrenal medulla, lysosomes, Golgi apparatus and endoplasmic reticulum in secretion and protein uptake, 320
Adrenocorticotropin, effect on glutathione reductase, 185
Alcian Blue, localization of polyanions, 383
Aldehyde-fuchsin, staining mechanism, and oxytalan fiber of mouse, 480
Alkaline phosphatase, activity
  effect of specimen thickness on ultrastructural localization, 721
  localization in submandibular gland, 572
  of neutrophilic leukocytes, 693
Aminopeptidase, activity, in mast cells, 441
Ammoniacal silver, staining of erythropoietic cells of chick, 148
Amylase, localization of activity, modified starch film method, 147
Amyloid
  and polarization microscopy, 663
  filaments, x-ray diffraction studies, 673
  human, morphologic components of deposits, 633
Analysis, of glycolytic intermediates and cofactors, oil well technique, 29
Announcements, 79, 221, 452, 604, 734
Antibody, to horseradish peroxidase, cytochemical detection of sites in spleen and lymph nodes, 237
Antigens, tissue, localization with peroxidase-labeled antibody method, 557
Antisera, antiribonuclease, cross-reactivity with heterologous mammalian ribonucleases, 410
Artery, formaldehyde-treated, modification of autofluorescence, 281
Aryl sulfatase
  and acid phosphatase, in developing nervous system, 582

Aryl sulfatase—*Continued*
localization of activity, in thyroid follicle cells, 467
Assay, chemical, cholinesterases and nonspecific esterases of gastrocnemius, 346
Autofluorescence, modification in formaldehyde-treated artery, 281

Basophilia, reversal of protein blocking in salt solutions, and localization of polyanions with Alcian Blue, 383
Bibliography of Dr. Ralph D. Lillie, 7
Bile, oxidation-reduction reaction of pigments, in obstructive icterus, 17
Bilirubin, conjugated, diazo reagent for staining in tissue sections, 419
Biography of Dr. Ralph D. Lillie, 3
Bis-(thioacetoxy) aurate, and acetyl disulfide, and acetylcholinesterase, 754
Blood platelets, cytochemistry of 5-hydroxytryptamine, specificity of reaction, 162
Book Reviews
Books Received, 64, 151, 209, 283, 389, 494, 593, 667

Brain
cryostat tissue sections, demonstration of fluorescent catecholamine terminals, 491
solvent action of acetone, 115

Campanula persicifolia, fluctuations in acid phosphatase activity, of spherosomes in guard cells, 791
Carbamido diacetyl, reaction to histologic sections, citrulline adaptation, 136
Carbamoyl phosphate, hydrolysis in endoplasmic reticulum and nuclear envelope of rat liver, 546
Carbohydrates, myelin, 486
Catecholamine, fluorescent terminals, histochemical demonstration in cryostat sections of brain tissue, 491
Cells
adrenal medulla, cytochemical studies, 320
alveolar, acid hydrolase activity, 102
cancerous, localization of adenosine triphosphatase activity, 678
erythropoietic, ammoniacal silver staining, 148
guard, fluctuations in acid phosphatase activity, 791
liver reticulum, hypertrophy following progesterone administration, 561
mast
changes induced by adenosine triphosphate and adenosine diphosphate, 707
damaging effects of horseradish peroxidase, 382
histochemically demonstrable aminopeptidase activity, 441
stain for histamine in tissue, 433
mucosal, absorption of horseradish peroxidase, 229
preneoplastic, localization of adenosine triphosphatase activity, 678
thyroid follicle, localization of aryl sulfatase activity, 467
Cellular fluid, determination of difference in refractive index at varying wavelengths, 271
Chelation, metal, and nitrous acid reactions of nitrosotyrosine, 191

Chlorogenic acid, and tyrosine, differentiation in plant tissues, 191
Cholinesterases, of gastrocnemius, chemical assay and electrophoresis, 346
Choroid plexus, micropinocytotic vesicles, rat choroid plexus, 278
Chyle, electron microscopic visualization of lipoproteins, 366
Citation Index, 80, 152, 222, 293, 399, 453, 495, 551, 605, 668, 735, 826
Citrulline, histochemical test, 136
Cofactors, glycolytic, quantitative analysis with oil well technique, 29
Cross-reactivity, antiribonuclease antisera with heterologous mammalian ribonucleases, 410
Cryostat, sections of brain tissue, demonstration of fluorescent catecholamine terminals, 491
Cytofluorometry, determination of lysine with dansylchloride, 459

Dansyl, staining, cytochemical demonstration of basic proteins, 440
Dansylchloride, cytofluorometric determination of lysine, 459
Demyelination, and myelination, histochemistry, 803
Diazonium, derivatives, and nitrous acid, 280
Diffraction, x-ray, studies on amyloid filaments, 673
Dimethylsulfoxide, preservation of cryostat-sectioned tissue, light and electron microscopy, 40
Dopamine, differentiation from noradrenaline in tissue sections, microspectrofluorometry, 263
Drugs, water-soluble, microautoradiography, 659
Duodenum, mucosal cells, absorption of horseradish peroxidase, 229

Electron microscopy
  and light microscopy
    dimethylsulfoxide and preservation of cryostat-sectioned tissue, 40
    selective staining of nervous tissue, 808
  5-hydroxytryptamine cytochemistry, specificity of reaction in blood platelets, 162
  localization of mitochondrial adenosine triphosphatase activity, 645
  rapid method of preparation of tissue, 815
  site of ferricyanide reduction by reductases within mictochondria, 49
  visualization of lipoproteins in plasma and and chyle, 366
Electron probe, in enzyme histochemistry, 273, 591
Electrophoresis, cholinesterases and nonspecific esterases of gastrocnemius, 346
Envelope, nuclear, hydrolysis of carbamoyl phosphate, 546
Enzymes (*see also* specific enzyme)
  and electron probe, 591
  fructose 1,6-diphosphate histochemical staining, 654
  histochemical reactions, evaluation, 519
  histochemistry, electron probe, 273, 591
  hydrolytic, during spermatogenesis, 249
  localization of activity, substrate film methods, 540
Esterases
  nonspecific, in mosquitos, 765
  of gastrocnemius, chemical assay and electrophoresis, 346

Ferricyanide, site of reduction by reductases within mitochondria, 49
Feulgen reactions, conditions influencing intensity, 371
Fibers
  nerve, varying extractability of fluorophores, 717
  oxytalan, staining mechanism of aldehyde-fuchsin, 480
Filaments, amyloid, x-ray diffraction studies, 673
Fixation, oxmium tetroxide, 157
Fixatives, effect on activity of glutamic oxalacetic transaminase, 181
Fluorescence, histochemical demonstration of monoamines, 659, 717
Fluorescent microscopy, localization of thiamine, in nervous tissue, 362
Fluorophores, varying extractability, in different nerve fibers, 717
Formaldehyde, fixation of fresh frozen sections, preservation of glucose 6-phosphatase activity, 819
Fructose 1,6-diphosphate, splitting enzymes, histochemical staining, 654

Gastrocnemius, cholinesterases and nonspecific esterases, chemical assay and electrophoresis, 346
Gels, starch, protein staining, 380
Gland, submandibular, localization of acid and alkaline phosphatase activity, 572
Glucagon, site of origin, in mammalian pancreas, 405
Glucose 6-phosphatase, activity, preservation in formaldehyde-fixed sections, 819
Glucose 6-phosphate dehydrogenase, hepatic, intracellular distribution of electrophoretically distinct forms, 62
Glutamic oxalacetic transaminase, activity, effect of lead and fixatives, 181

Glutaraldehyde, purification, and preservation of acid phosphatase activity, 199
Glutathione reductase
determination of activity, effect of adrenocorticotropin, 185
distribution, effect of adrenocorticotropin, 185
Glycoprotein, in myelin, 486
Golgi apparatus, in secretion and protein uptake, by adrenal medulla cells, 320

Hematoidin, and oxidation-reduction reactions of bile pigments in obstructive icterus, 17
Histamine, mast cell stain, in tissue, 433
Histochemical Titles from Current Literature, 68, 211, 284, 390, 445, 595, 728
Histone, nuclear, changing patterns during development, 473
Hormone, bovine luteinizing, immunofluorescent localization, 205
Horseradish peroxidase
absorption, by mucosal cells of duodenum, 229
cytochemical detection of sites antibodies in spleen and lymph nodes, 237
mast cell-damaging effect, resistance of Wistar/Furth rats, 382
Hyaluronidase, activity, of alveolar macrophages, 688
Hydrolysis, carbamoyl phosphate, in endoplasmic reticulum and nuclear envelope of rat liver, 546
5-Hydroxytryptamine, cytochemistry at electron microscope level, specificity of reaction in blood platelets, 162
Hypertrophy, liver cell reticulum, following progesterone administration, 561

Icterus, obstructive, oxidation-reduction reactions of bile pigments, 17
Immunofluorescence, studies on site of origin of glucagon in mammalian pancreas, 405
Inclusion bodies, in alveolar cells, acid hydrolase activity, 102
Intensity, of Feulgen reaction, 371
Intermediates, glycolytic, quantitative analysis with oil well technique, 29

Keratin, ninhydrin histochemical test, 428

Lactoperoxidase, bovine, cytochemical protein tracer for electron microscopy, 275
Lead, effect on activity of glutamic oxalacetic transaminase, 181
Lead ion, localization of nucleoside phosphatases, 530
Leukocytes, neutrophilic, determination of alkaline phosphatase activity, 693
Light microscopy
and electron microscopy
dimethylsulfoxide and preservation of cryostat-sectioned tissue, 40
selective staining of nervous tissue, 808
rapid method of preparation of tissue, 815
Lipid, -protein relationship, analysis, 119
Lipoproteins, electron microscopic visualization in plasma and chyle, 366
Liver, mitochondria, demonstration of ornithine carbomoyltransferase activity, 172
Localization
acid phosphatase activity, in submandibular gland, 572
alkaline phosphatase activity
effect of thickness of specimen, 721
in submandibular gland, 572
amylase, modified starch film method, 147
aryl sulfatase activity, in thyroid follicle cells, 467
enzyme activities, substrate film methods, 540
fluorescent microscopic, of thiamine in nervous tissue, 362
immunofluorescent, of bovine luteinizing hormone, 205
intracristal, succinic dehydrogenase activity, 487
multiple tissue antigens, with peroxidase-labeled antibody method, 557
Renshaw elements, 128
peroxidase activity, in rat hepatic microbodies, 547
polyanions, with Alcian Blue, 383
use of lead ion for nucleoside phosphatase, 530
Lymph nodes, cytochemical detection of sites of antibody to horseradish peroxidase, 237
Lysosomes, in rabbit lung, acid hydrolase activity, 102
Lysine, cytofluorometric determination with dansylchloride, 459
Lysosomes, in secretion and protein uptake by adrenal medulla cells, 320

Macrophages, alveolar, hyaluronidase activity, 688
Melanomas, mouse, cytochemical and ultrastructural observations, 299
Melanosomes, compound, origins, 299
Membranes, microsomal, subfractionation and composition, 611
Metal, chelation, and nitrous acid reactions of nitrosotyrosine, 191
Methylcholanthrene, cancer induction, localisation of adenosine triphosphatase activity, 678
Microautoradiography, water-soluble drugs, 659

Microbodies, rat hepatic, localization of peroxidase activity, 547
Micropinocytotic vesicles, in rat choroid plexus, functional polarization, 278
Microscopy (*see* specific kind)
Microspectrofluorometry, differentiation of dopamine from noradrenaline in tissue sections, 263
Mitochrondria, liver, demonstration of ornithine transferase activity, 172
Monoamines, fluorescent histochemical demonstration, 659, 717
Mosquitos, nonspecific esterases, 765
Mucopolysaccharide, acid, absence in myelin, 119
Muscle, human cardiac, demonstration of sympathetic nerves, 590
Myelin
  and glycoproteins, 486
  carbohydrates, 486
  histochemistry
    absence of acid mucopolysaccharide, 119
    analysis of lipid-protein relationships, 119
    solvent action of acetone on brain and lipid-rich tissues, 115
    trypsin-digestible and -resistant proteins, 110
Myelination, and demyelination, histochemistry, 803

N-acetyl-O-diacetylneuraminic acid, resistant to neuramindase, 663
Nerves
  fibers, varying extractability of fluorophores, 717
  sympathetic, demonstration in human cardiac muscle, 590
Nervous system, developing, aryl sulfatase and acid phosphatase, 582
Neuraminidase, N-acetyl-O-diacetylneuraminic acid resistance, 663
Ninhydrin, histochemical test specific for hair keratin, 428
Nitrosotyrosine, nitrous acid reactions and metal chelation, 191
Nitrous acid
  action on Feulgen- and periodic acid-Schiff-stained preparations, conversion into diazonium derivatives, 280
  reactions, and metal chelation, 191
Noradrenaline, differentiation from dopamine in tissue sections, microspectrofluorometry, 263

Oil well technique, quantitative analysis of glycolytic intermediates and cofactors, 29
Ornithine carbamoyltransferase, demonstration of activity in liver mitochondria, 172
Osmium, compounds with multiple basic or acidic groups, stains for ultrastructure, 87
Osmium tetroxide, fixation, 157
Oxidation, and reduction reactions, of bile pigments in obstructive icterus, 17

Pancreas, mammalian, site of origin of glucagon, 405
Peroxidase
  antibody-labeling method for localization, 557
  localization of activity, in rat hepatic microbodies, 547
Phosphatases, nucleoside, localization with lead ion, 530
Pigments, bile, oxidation-reduction reactions in obstructive icterus, 17
Pilomatrixomas, histochemical test for citrulline, 136
Plasma, electron microscopic visualization of lipoproteins, 366
Polarization
  microscopy, and amyloid, 663
  of micropinocytotic vesicles, in rat choroid plexus, 278
Polyanions, localization with Alcian Blue, 383
Premelanosomes, origin, 299
Preservation, of fine structure, dimethylsulfoxide and cryostat-sectioned tissue, 40
Proceedings, 1968 Histochemical Society Meeting, 501–545
Progesterone, postadministration hypertrophy, in liver cell reticulum, 561
Proteins
  basic, cytochemical demonstration by dansyl staining, 440
  bovine lactoperoxidase, cytochemical tracer for electron microscopy, 275
  -lipid relationship, analysis, 119
  reversal of blocking of basophilia in salt solutions, and localization of polyanions with Alcian Blue, 383
  staining on starch gels, 380
  trypsin-digestible, histochemistry of myelin, 110
  trypsin-resistant, histochemistry of myelin, 110
  uptake by adrenal medulla cells, lysosomes, Golgi apparatus and endoplasmic reticulum, 320
Purification, glutaraldehyde, and preservation of acid phosphatase activity, 199

Reactions, oxidation-reduction, bile pigments in obstructive icterus, 17
Reagent, diazo, specific staining of conjugated bilirubin in tissue sections, 419

Reductases, ferricyanide reduction within mitochondria, 49
Reduction
and oxidation reactions, of bile pigments in obstructive icterus, 17
ferricyanide, by reductases within mitochondria, 49
Refractive index, cellular fluid, determination of difference at varying wavelengths, 271
Renshaw elements, localization and acetylcholinesterase content, 128
Reticulum
endoplasmic
alterations in porphyric rats, 337
hydrolysis of carbamoyl phosphate, 546
in secretion and protein uptake by adrenal medulla cells, 320
liver cells, hypertrophy following progesterone administration, 561
Ribonucleases, heterologous mammalian, cross-reactivity with antiribonuclease antisera, 410

Salt solutions, reversal of protein blocking of basophilia, and localization of polyanions with Alcian Blue, 383
Secretion, by adrenal medulla cells, lysosomes, Golgi apparatus and endoplasmic reticulum, 320
Sections, formaldehyde-fixed fresh frozen, preservation of glucose 6-phosphatase activity, 819
Specificity, enzyme histochemical reactions, evaluation, 519
Specimen, effect of thickness on ultrastructural localization of alkaline phosphatase activity, 721
Spermatogenesis, hydrolytic enzymes, 249
Spleen, cytochemical detection of sites of antibody to horseradish peroxidase, 237
Staining
aldehyde-fuchsin, and oxytalan fiber of mouse, 480
fructose 1,6-diphosphate splitting enzymes, 654
nervous tissue, for light and electron microscopy, 808
Starch film, modified method for localization of amylase activity, 147
Starch gels, protein staining, 380
Structure, fine, dimethylsulfoxide and cryostat-sectioned tissue, 40
Subfractionation, of microsomal membranes, 611
Substrate, for succinic dehydrogenase, succinyl lecithin, 58
Substrate film, method for localization of enzyme activity, 540
Succinic dehydrogenase
intracristal localization of activity, 487
succinyl lecithin as substrate, 58
Succinyl lecithin, substrate for succinic dehydrogenase, 58

Terminals, fluorescent catecholamine, histochemical demonstration in cryostat sections of brain tissue, 491
Thiamine, in nervous tissue, fluorescent microscopic localization, 362
Thiolacetic acid, histochemical method for acetylcholinesterase, and acetyl disulfide, 743
Thyroid, follicle cells, localization of aryl sulfatase activity, 467
Tissue
cryostat sections
demonstration of fluorescent catecholamine terminals, 491
dimethylsulfoxide and preservation, 40
freeze-dried embedded, mast cell stain for histamine, 433
lipid-rich, solvent action of acetone, 115
nervous
fluorescent microscopic localization of thiamine, 362
selective staining for light and electron microscopy, 808
plant, differentiation between tyrosine and chlorogenic acid, 191
preparation for light and electron microscopy, 815
sections
microspectrofluorometric differentiation of dopamine from noradrenaline, 263
staining of conjugated bilirubin, 419
Tracer, cytochemical protein, for electron microscopy, 275
Tyrosine, and chlorogenic acid, differentiation in plant tissues, 191

Ultrastructure
in B-16 and Harding-Passey mouse melanomas, 299
stains, osmium-containing compounds with multiple basic or acidic groups, 87

X-ray, diffraction studies, on amyloid filaments, 673
β-D-Xylosidase, histochemical demonstration of activity, 489

THE JOURNAL OF HISTOCHEMISTRY and CYTOCHEMISTRY

Official Journal of the Histochemical Society

TABLE OF CONTENTS VOLUME 16, 1968

No. 1, January 1968

Biography of Dr. Ralph D. Lillie 3
Bibliography of Dr. Ralph D. Lillie 7
R. D. Lillie and P. Pizzolato. Histochemical Studies of Oxidation and Reduction Reactions of the Bile Pigments in Obstructive Icterus, with Some Notes on Hematoidin 17
F. M. Matschinsky, J. V. Passonneau and O. H. Lowry. Quantitative Histochemical Analysis of Glycolytic Intermediates and Cofactors with an Oil Well Technique 29
Daniel Zagury, Pat G. Model and George D. Pappas. The Preservation of the Fine Structure of Cryostat-sectioned Tissue with Dimethylsulfoxide for Combined Light and Electron Microscopy 40
Kazuo Ogawa, Takuma Saito and Hiroshi Mayahara. The Site of Ferricyanide Reduction by Reductases within Mitochondria as Studied by Electron Microscopy 49
Y. H. Abdulla, C. W. M. Adams and O. B. Bayliss. Succinyl Lecithin as a Substrate for Succinic Dehydrogenase 58
Letter to the Editor
Samuel Hori and Sei-ichi Matsui. Distribution of Electrophoretically Distinct Forms of Hepatic Glucose 6-Phosphate Dehydrogenase 62
Book Reviews 64
Histochemical Titles from Current Literature 68
Announcements 79
Citation Index 80

No. 2, February 1968

Arnold M. Seligman, Hannah L. Wasserkrug, Chandicharan Deb and Jacob S. Hanker. Osmium-containing Compounds with Multiple Basic or Acidic Groups as Stains for Ultrastructure 87
Sidney Goldfischer, Yutaka Kikkawa and Lee Hoffman. The Demonstration of Acid Hydrolase Activities in the Inclusion Bodies of Type II Alveolar Cells and Other Lysosomes in the Rabbit Lung 102
C. W. M. Adams and O. B. Bayliss. Histochemistry of Myelin. V. Trypsin-digestible and Trypsin-resistant Proteins 110
C. W. M. Adams and O. B. Bayliss. Histochemistry of Myelin. VI. Solvent Action of Acetone on Brain and Other Lipid-rich Tissues 115
C. W. M. Adams and O. B. Bayliss. Histochemistry of Myelin. VII. Analysis of Lipid-Protein Relationships and Absence of Acid Mucopolysaccharide 119
S. D. Erulkar, C. W. Nichols, M. B. Popp and G. B. Koelle. Renshaw Elements: Identification and Acetylcholinesterase Content 128
Elizabeth J. Holmes. A Histochemical Test for Citrulline Adaptation of the Carbamido Diacetyl Reaction to Histologic Sections with Positive Results in Pilomatrixomas (Calcifying Epitheliomas) 136
Letters to the Editor
Gilles Tremblay and Jean Charest. Modified Starch Film Method for the Histochemical Localization of Amylase Activity 147
Gerald D. Meetz and Edith K. MacRae. Ammoniacal Silver Staining of the Erythropoietic Cells of the Chick 148
Book Reviews 151
Citation Index 152

No. 3, March 1968

W. Burkl and H. Schiechl. A Study of Osmium Tetroxide Fixation 157
Guillermo Jaim Etcheverry and Luis Maria Zieher. Cytochemistry of 5-Hydroxytryptamine at the Electron Microscope Level. I. Study of the Specificity of the Reaction in Isolated Blood Platelets 162
Akira Mizutani. Cytochemical Demonstration of Ornithine Carbamoyltransferase Activity in Liver Mitochondria of Rat and Mouse 172
Sin Hang Lee and Richard M. Torack. The Effects of Lead and Fixatives on Activity of Glutamic Oxalacetic Transaminase 181
Norberto A. Schor and David Glick. Determination of Glutathione Reductase Activity in Microgram Samples of Tissue, Quantitative Histologic Distribution of the Enzyme in the Rat Adrenal and Effect of Adrenocorticotropin 185
R. M. Reeve. Histochemical Differentiation between Tyrosine and Chlorogenic Acid in Plant Tissues. I. Nitrous Acid Reactions and Metal Chelation of Nitrosotyrosine 191
H. Dariush Fahimi and Pierre Drochmans. Purification of Glutaraldehyde and Its Significance for Preservation of Acid Phosphatase Activity 199
Letter to the Editor
David K. Pomerantz and K. Rogers Simmons. Immunofluorescent Localization of Bovine Luteinizing Hormone 205
Book Reviews 208
Histochemical Titles from Current Literature 211
Announcement 221
Citation Index 222

No. 4, April 1968

J. S. Hugon and M. Borgers. Absorption of Horseradish Peroxidase by the Mucosal Cells of the Duodenum of Mouse. I. The Fasting Animal 229
Werner Straus. Cytochemical Detection of Sites of Antibody to Horseradish Peroxidase in Spleen and Lymph Nodes 237
Zoltan Posalaki, Dezső Szabó, Ernő Bácsi and István Ökrös. Hydrolytic Enzymes during Spermatogenesis in Rat. An Electron Microscopic and Histochemical Study 249
Anders Björklund, Berndt Ehinger and Bengt Falck. A Method for Differentiating Dopamine from Noradrenaline in Tissue Section by Microspectrofluorometry 263
K. A. Chaubal, Z. Lodin and K. S. Korgaonkar. Determination of Difference in Refractive Index of Cellular Fluid at Wavelengths of 436 and 546 mμ 271
Letters to the Editor
W. King Engel, Jerome S. Resnick and Eugene Martin. The Electron Probe in Enzyme Histochemistry 273
Richard C. Graham, Jr. and Robert W. Kellermeyer. Bovine Lactoperoxidase as a Cytochemical Protein Tracer for Electron Microscopy 275
Norwin H. Becker and Ruben Almazon. Evidence for the Functional Polarization of Micropinocytotic Vesicles in the Rat Choroid Plexus 278
C. J. Tandler. The Action of Nitrous Acid on Feulgen- and Periodic Acid-Schiff-stained Preparations. Conversions into Diazonium Derivatives 280
I. S. de la Lande and J. G. Waterson. Modification of Autofluorescence in the Formaldehyde-treated Rabbit Ear Artery by Evans Blue 281
Books Received 283
Histochemical Titles from Current Literature 284
Citation Index 293

No. 5, May 1968

Alex B. Novikoff, Arline Albala and Luis Biempica. Ultrastructural and Cytochemical Observations on B-16 and Harding-Passey Mouse Melanomas. The Origin of Premelanosomes and Compound Melanosomes 299

ERIC HOLTZMAN AND REGINA DOMINITZ. Cytochemical Studies of Lysosomes, Golgi Apparatus and Endoplasmic Reticulum in Secretion and Protein Uptake by Adrenal Medulla Cells of the Rat 320
ZOLTAN POSALAKI AND TIBOR BARKA. Alterations of Hepatic Endoplasmic Reticulum in Porphyric Rats 337
KEVIN D. BARRON, A. T. ORDINARIO, J. BERNSOHN, A. R. HESS AND M. T. HEDRICK. Cholinesterases and Nonspecific Esterases of Developing and Adult (Normal and Atrophic) Rat Gastrocnemius. 1. Chemical Assay and Electrophoresis 346
C. TANAKA AND J. R. COOPER. The Fluorescent Microscopic Localization of Thiamine in Nervous Tissue 362
ALBERT J. JONES AND J. MICHAEL PRICE. Some Methods of Electron Microscopic Visualization of Lipoproteins in Plasma and Chyle 366
ARLINE D. DEITCH, DIETER WAGNER AND RALPH M. RICHART. Conditions Influencing the Intensity of the Feulgen Reaction 371
Letters to the Editor
EDWARD J. MASSARO AND CLEMENT L. MARKERT. Protein Staining on Starch Gels 380
RAMZI S. COTRAN, MORRIS J. KARNOVSKY AND ANDRES GOTH. Resistance of Wistar/Furth Rats to the Mast Cell-damaging Effect of Horseradish Peroxidase ... 382
J. E. SCOTT, J. DORLING AND R. A. STOCKWELL. Reversal of Protein Blocking of Basophilia in Salt Solutions: Implications in the Localization of Polyanions using Alcian Blue 383
Book Reviews 387
Histochemical Titles from Current Literature 390
Citation Index 399

No. 6, JUNE 1968

NORIO OKADA, RYOSABURO TAKAKI AND MASAYASU KITAGAWA. Histologic and Immunofluorescent Studies on the Site of Origin of Glucagon in Mammalian Pancreas 405
SHIGERU MORIKAWA, MASAO YAMAMURA, TAKAYUKI HARADA AND YOSHIHIRO HAMASHIMA. Studies on Cross-Reactivity of Antiribonuclease Antisera with Heterologous Mammalian Ribonucleases 410
V. J. DESMET, A.-M. BULLENS, J. DE GROOTE AND K. P. M. HEIRWEGH. A New Diazo Reagent for Specific Staining of Conjugated Bilirubin in Tissue Sections 419
ELIZABETH J. HOLMES. A Ninhydrin Histochemical Test Specific for Hair Keratin 428
WALTER B. SHELLEY, SVEN ÖHMAN AND HERBERT M. PARNES. Mast Cell Stain for Histamine in Freeze-Dried Embedded Tissue 433
Letters to the Editor
N. R. RINGERTZ. Cytochemical Demonstration of Basic Proteins by Dansyl Staining 440
LENNART ENERBÄCK AND C. GÖRAN HANSSON. A Note on the Histochemically Demonstrable Aminopeptidase Activity of Rat Mast Cells 441
Book Reviews 444
Histochemical Titles from Current Literature 445
Announcement 452
Citation Index 453

No. 7, JULY 1968

A. ROSSELET AND F. RUCH. Cytofluorometric Determination of Lysine with Dansyl-chloride 459
ROLF SELJELID AND HEIKKI J. HELMINEN. The Localization of Aryl Sulfatase Activity in Thyroid Follicle Cells 467
JACK C. VAUGHN. Changing Nuclear Histone Patterns during Development. I. Fertilization and Early Cleavage in the Crab, *Emerita analoga* 473
STEPHANIE T. K. MANDER, L. N. MANDER AND G. G. CARMICHAEL. The Staining Mechanism of Aldehyde-Fuchsin, with Reference to the Oxytalan Fiber in the Mouse 480

Letters to the Editor
RICHARD U. MARGOLIS. Glycoproteins in Myelin 486
C. W. M. ADAMS AND O. B. BAYLISS. Myelin Carbohydrates 486
K. C. TSOU, CLEON W. GOODWIN, BETTE SEAMOND AND DWO LYNM. Intracristal Localization of Succinic Dehydrogenase Activity with a New Osmium-containing Tetra-Tetrazolium Salt 487
JOHN R. ESTERLY, ALFRED C. STANDEN AND BJARNE PEARSON. The Histochemical Demonstration of β-D-Xylosidase Activity 489
GIAN-FRANCO PLACIDI AND DAVID T. MASUOKA. Histochemical Demonstration of Fluorescent Catecholamine Terminals in Cryostat Sections of Brain Tissue 491
Books Received 494
Citation Index 495

No. 8, AUGUST 1968

Nineteenth Annual Meeting of the Histochemical Society
Minutes of the Business Meeting 501
Proceedings of the Histochemical Society 501
Symposium on Critical Evaluation of Morphologic Histochemical Techniques for Demonstrating Enzymes
GEORGE G. GLENNER. Evaluation of the Specificity of Enzyme Histochemical Reactions 519
HAROLD L. MOSES AND ALAN S. ROSENTHAL. Pitfalls in the Use of Lead Ion for Histochemical Localization of Nucleoside Phosphatases 530
ROGER DAOUST. The Localization of Enzyme Activities by Substrate Film Methods—Evaluation and Perspectives 540
Letters to the Editor
AKIRA MIZUTANI AND HAJIME FUJITA. Hydrolysis of Carbamoyl Phosphate in the Endoplasmic Reticulum and Nuclear Envelope of Rat Liver 546
H. DARIUSH FAHIMI. Cytochemical Localization of Peroxidase Activity in Rat Hepatic Microbodies (Peroxisomes) 547
Citation Index 551

No. 9, SEPTEMBER 1968

PAUL K. NAKANE. Simultaneous Localization of Multiple Tissue Antigens Using the Peroxidase-labeled Antibody Method: A Study on Pituitary Glands of the Rat 557
JOHN B. EMANS AND ALBERT L. JONES. Hypertrophy of Liver Cell Smooth Surfaced Reticulum following Progesterone Administration 561
BRUCE I. BOGART. The Fine Structural Localisation of Alkaline and Acid Phosphatase Activity in the Rat Submandibular Gland 572
A. E. CHOY AND H. CRAVIOTO. A Study of Aryl Sulfatase and Acid Phosphatase in the Developing Nervous System of the Rat 582
Letters to the Editor
JOHN R. MCLEAN. An Improved Technique for the Demonstration of Sympathetic Nerves in Human Cardiac Muscle 590
W. KING ENGEL, JEROME S. RESNICK AND EUGENE MARTIN. The Electron Probe in Enzyme Histochemistry 591
Book Reviews 593
Histochemical Titles from Current Literature 595
Announcement 604
Citation Index 605

No. 10, OCTOBER 1968

GUSTAV DALLNER AND LARS ERNSTER. Subfractionation and Composition of Microsomal Membranes: A Review 611
G. G. GLENNER, H. R. KEISER, H. A. BLADEN, P. CUATRECASAS, E. D. EANES, J. S. RAM, J. N. KANFER AND R. A. DELELLIS. Amyloid. VI. A Comparison of Two Morphologic Components of Human Amyloid Deposits 633

I. William Grossman and Dale H. Heitkamp. Electron Microscopic Localization of Mitochondrial Adenosine Triphosphatase Activity 645
Sven E. Brolin, Christian Berne, Birger Petersson and Arnold Larsson. Histochemical Staining and Microchemical Studies of Fructose 1,6-Diphosphate Splitting Enzymes in the Pancreatic Islets and Liver of NZO Mice 654
David Masuoka and Gian-Franco Placidi. A Combined Procedure for the Histochemical Fluorescence Demonstration of Monoamines and Microautoradiography of Water-soluble Drugs 659
Letters to the Editor
Carlo Ravetto. Histochemical Identification of N-acetyl-O-diacetylneuraminic Acid Resistant to Neuraminidase 663
R. A. DeLellis, G. G. Glenner and J. Sri Ram. Histochemical Observations on Amyloid with Reference to Polarization Microscopy 663
Book Reviews 666
Citation Index 668

No. 11, November 1968

E. D. Eanes and G. G. Glenner. X-ray Diffraction Studies on Amyloid Filaments ... 673
János Sugár, Orsolya Csuka and József Tóth. Localization of Adenosine Triphosphatase Activity in Preneoplastic and Cancerous Cells of the Mouse Skin Induced by Methylcholanthrene 678
John F. Goggins, Gerald S. Lazarus and Harold M. Fullmer. Hyaluronidase Activity of Alveolar Macrophages 688
M. van der Ploeg and P. van Duijn. Cytophotometric Determination of Alkaline Phosphatase Activity of Individual Neutrophilic Leukocytes with a Biochemically Calibrated Model System 693
Bertil Diamant and Per Göran Krüger. Structural Changes of Isolated Rat Peritoneal Mast Cells Induced by Adenosine Triphosphate and Adenosine Diphosphate 707
Anders Björklund and Bengt Falck. An Improvement of the Histochemical Fluorescence Method for Monoamines. Observations on Varying Extractability of Fluorophores in Different Nerve Fibers 717
Letter to the Editor
Hiroshi Mayahara and Kazuo Ogawa. The Effect of Thickness of Specimen on the Ultrastructural Localization of Alkaline Phosphatase Activity in the Rat Proximal Convoluted Tubule 721
Book Reviews 725
Histochemical Titles from Current Literature 728
Announcements 734
Citation Index 735

No. 12, December 1968

George B. Koelle and Robert S. Horn. Acetyl Disulfide, $(CH_3COS)_2$, A Major Active Component in the Thiolacetic Acid Histochemical Method for Acetylcholinesterase 743
George B. Koelle, Richard Davis and Martina Devlin. Acetyl Disulfide, $(CH_3COS)_2$, and Bis-(Thioacetoxy) Aurate (I) Complex, $Au(CH_3COS)_2^-$, Histochemical Substrates of Unusual Properties with Acetylcholinesterase 754
Thierry A. Freyvogel, Robert L. Hunter and Elizabeth M. Smith. Nonspecific Esterases in Mosquitos 765
Helen P. Sorokin and Sergei Sorokin. Fluctuations in the Acid Phosphatase Activity of Spherosomes in Guard Cells of *Campanula persicifolia* 791
Moshe Wolman. Histochemistry of Demyelination and Myelination 803
Lillian R. Berkowitz, Olga Fiorello, Lawrence Kruger and David S. Maxwell. Selective Staining of Nervous Tissue for Light Microscopy following Preparation for Electron Microscopy 808

Letters to the Editor
JANICE S. GLENN AND THOMAS PETER BENNETT. A Rapid Method for Preparing Tissue for Light and Electron Microscopy 815
E. MANNS. Preservation of Glucose 6-Phosphatase Activity in Formaldehyde-fixed Fresh Frozen Sections 819
Book Reviews 823
Citation Index 826
Authors Index, Volume 16 832
Subject Index, Volume 16 834
